

SMALL WALK-IN CLIMATIC TEST CHAMBER FOR STABILITY TESTS

MODEL, CM-0/3358m

GENERAL:

Pharmaceutical stability chambers can be either compact, modular or walk-in, depending on the number of samples to be tested, but sometimes, compact chambers (600 or 1200 litres) cannot store the desired number of samples to be tested as they are too small in volume. The solution, a small chamber that can be visited.

The **CM-0/3358m** chamber has a small volume but is used to the maximum to be able to contain a large number of samples in parallel for testing. Its two side shelves with 7 levels per shelf allow a large amount of storage space and the samples can be placed as ergonomically as possible. In addition, the chamber can be installed in a small space, making maximum use of the available space.

TECHNICAL FEATURES:

- Volume: 3.358 liters.
- Internal dimensions: 1.900 x 1.880 x 940 mm (H x W x D).
- External dimensions: 2.070 x 2.020 x 1.260 mm (H x W x D).
- Temperature range: from +15 °C to +50 °C.
- Humidity range: 50 % to 80 % R.H.
- Pivoting access door. Dimensions: 1.850 x 800 mm (H x W)
- Observation window. Dimensions: 300 x 300 mm (H x W)
- Door with key lock and interior security opening.
- Interior made in stainless steel.
- 2 shelves made in stainless steel with 7 ventilated and height adjustable trays on both sides.
- 1 Access port made in stainless steel, 80 mm of diameter.
- Control by double independent Eurotherm regulators.
- Data recorder system according with FDA, 21 CFR part 11.
- Ethernet communication port.
- USB for extraction of data files.
- 80 liters water reservoir tank.
- CE mark.
